Birth of an Underdog

Innovative Yet Controversial Design

The Brewster Buffalo was conceived in the late 1930s as a replacement for the aging Boeing F2B. Its design was both innovative and controversial, featuring a cantilever monoplane wing, enclosed cockpit, and retractable landing gear. However, the aircraft's small size and limited range raised concerns among naval officials.

Despite the skepticism, the Buffalo went into production in 1940. The Royal Navy's Fleet Air Arm, desperate for modern aircraft, placed an Free Download for 170 Buffaloes. The United States Navy also Free Downloadd a smaller number, but intended to use them primarily for training purposes.

Unexpected Performance in Combat

Early Disasters and Surprising Triumphs

When the Buffalo was first deployed in combat during the Battle of Britain, it suffered heavy losses against the more advanced German fighters. This led to the widespread perception that the Buffalo was a failure.

However, in the hands of skilled pilots, the Buffalo proved to be a formidable opponent. Finnish ace Eino Luukkanen achieved 14 victories flying the Buffalo during the Winter War against the Soviet Union. American pilot Edgar Foss also scored several victories in the Pacific Theater.
