- Amoebozoa - Shape-shifting parasites like Entamoeba and Acanthamoeba
- Excavata - Flagellated parasites such as Giardia and Trichomonas

- Chromalveolata - Photosynthetic parasites like Plasmodium and Toxoplasma

Amoebozoa: Shape-Shifting Parasites

Amoebozoa are amoeba-like parasites capable of altering their shape to navigate and invade host cells. "Parasitic Protozoa Volume 10" delves into the adaptations and life cycles of key species, including:

- **Entamoeba histolytica:** The causative agent of amoebic dysentery, a devastating gastrointestinal disease.
- **Acanthamoeba spp.:** Free-living amoebae that can cause severe infections of the eye, brain, and skin.

Excavata: Flagellated Parasites

Excavata are characterized by their flagella, which enable them to glide, swim, and invade host cells. "Parasitic Protozoa Volume 10" explores the biology and diversity of these parasites, including:

- **Giardia lamblia:** A common cause of diarrhea and gastrointestinal distress worldwide.
- **Trichomonas vaginalis:** A sexually transmitted parasite responsible for vaginal infections.

Chromalveolata: Photosynthetic Parasites

Chromalveolata are a unique group of parasites that possess photosynthetic capabilities. "Parasitic Protozoa Volume 10" examines the intriguing adaptations and life cycles of these organisms, including:

- **Plasmodium spp.:** The causative agents of malaria, a deadly disease that affects millions of people globally.
- **Toxoplasma gondii:** A widespread parasite that can infect humans and animals, causing a variety of health issues.

Medical Significance of Parasitic Protozoa

"Parasitic Protozoa Volume 10" underscores the profound medical significance of these parasites, highlighting their impact on human health and disease. The book explores:

- **Pathogenesis:** The mechanisms by which parasitic protozoa cause disease
- **Clinical manifestations:** The symptoms and signs associated with protozoan infections
- **Diagnosis:** The methods used to identify and diagnose protozoan parasites
- **Treatment:** The available medications and therapies for treating protozoan infections
